

Backup as-a-Service

A Cloud service from Data Integrity

Simplify your backup and recovery processes to ensure your data is always protected.

Your data is the lifeblood of your business. What would happen if your critical business applications and workloads were not available? Even the most vigilant organizations are at risk of data loss, and losing critical business data can spell disaster for a company.

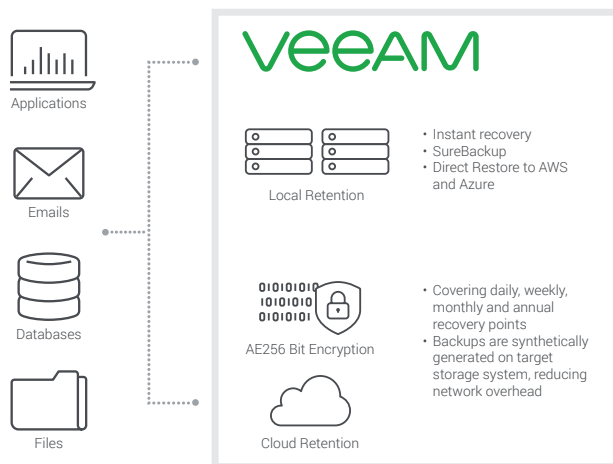

Data Integrity's Managed Backup Service provides a complete backup and recovery solution for your business data in the cloud. Managed Backup is a flexible solution that supports multi-cloud strategies with support for AWS, Microsoft Azure and IBM Cloud.

Protect your Physical, Virtual and Office 365 from a single tool!

Our managed Backup Service is built on leading technology from Veeam, featuring:

- Local and Cloud retention
- Support for AWS, Azure, IBM Cloud and S3 compatible storage
- Secure communication with AES-256 Encryption

Built on industry best practices.

- Have at least three copies of your data
- Store the copies on two different media
- Keep one backup copy offsite

Managed Backup Service provides your business:

- Access to our skilled engineers without the cost of managing your own data center team
- Zero investment in your own expensive backup infrastructure
- The ability to free up scarce resources
- Decreased administrative costs
- Continuous Monitoring to make sure your backups are running smoothly

Why Data Integrity

Data Integrity is a technology based integrator, that's been providing solutions to many of Canada's top companies for over 35 years. With products and services from the world's top technology companies, our solutions are implemented, supported and often managed by our dedicated team of highly certified experts.
