

# Disaster Recovery as-a-Service

## A Cloud service from Data Integrity

In today's always-on world, disaster recovery is no longer a luxury you can do without.

**IT failures, power outages, natural disasters and the growing rise of cyber-attacks means it is no longer a matter of if a disruption will occur, but when.**

**Don't let your company become another statistic. Implement a scalable, flexible and secure disaster recovery solution with Data Integrity's Disaster Recovery as a Service.**

### Zerto – The leader in Disaster Recovery

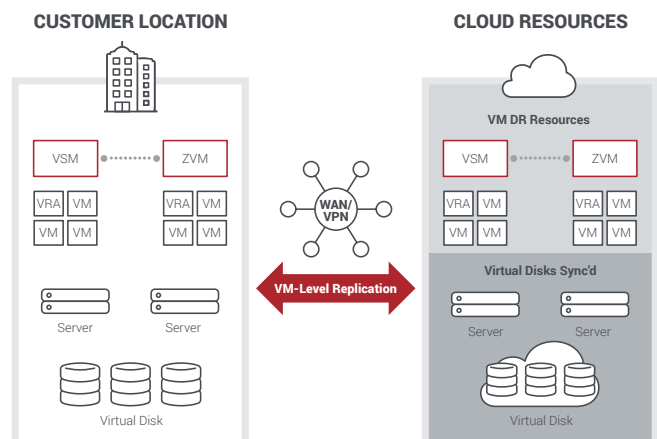

Your critical business systems will be continuously replicated in the cloud using the global leader in Disaster Recovery software: Zerto. Recover from floods, fires, hurricanes and ransomware attacks with automated processes, leveraging Zerto's continuous protection.

Zerto highlights:

- RPO/RTO measured in seconds and minutes compared to days
- Don't need to "build the environment" from backup copies
- DR environment is pre-staged and storage I/Os are synchronized from production

### Continuous DR Protection

### Why a managed DR service?

- We manage the design, deployment and initial testing
- Ongoing monitoring and reporting
- A flexible cloud-based solution, tailored to meet your business needs
- Save on time and resources with our Disaster Recovery staff

### Why Data Integrity

Data Integrity is a technology based integrator, that's been providing solutions to many of Canada's top companies for over 35 years. With products and services from the world's top technology companies, our solutions are implemented, supported and often managed by our dedicated team of highly certified experts.
